Description of Coverage

Current Crop Year

COVERED PERILS	Adverse Weather Conditions, Fire, Uncontrollable Insects & Disease, Wildlife, Failure of Irrigation Water Supply (due to a covered loss), Volcanic Eruption.
COVERAGE PLAN	<p>Revenue Protection The revenue guarantee is based on the APH yield. If the projected price for the insured crop is higher by harvest time, the revenue protection increases accordingly, with no additional premium.</p> <p>Revenue Protection with Harvest Price Exclusion The revenue guarantee is based on the APH. However, if the harvest price rises above the projected price, the revenue protection does not increase.</p> <p>Yield Protection If the farm's actual yield is less than the guaranteed yield, the yield protection payment is equal to the production deficit multiplied by the price election. These bushels can be insured at a price ranging from 55% to 100% of the projected price set by the USDA.</p>
COVERAGE OPTIONS	50, 55, 60, 65, 70, 75, 80 and 85% of your average yield.
